1. COMPLETE CHANGELOG & UPDATES

لجسلاثيدحتلا لايدعتلا لذفنملا ىلاء ةصنملا

01

Admin Dashboard Null-Safety Fix

للاصأطخ TypeError لرق ص نأصخ ريغ ةقّرعم يف ةحول لإ

Fixed "Cannot read properties of undefined (reading toLowerCase)" by implementing defensive guards across search, filtering, and undefined card records in AdminDashboardView.tsx.

02

Brand Unification Strictly to "Smart Card"

ديحوتمسلاا لاجتلا لماكلاب ىلا Smart Card لذحا لامجرتلا ةليدبلا

Replaced "luxury smart card gatway" and Arabic name variations throughout the site (HTML head, OpenGraph, headers, modals, cards, and footers) strictly with "Smart Card".

03

Production Deployment & Live Vercel Linking

ةفاك لومرلا طبارلا لاطنب Vercel رشابملا (smart-card-inky.vercel.app) طبلهيجوت

Integrated GitHub repository (ajaybyzaher11-cloud/Smart-card) and deployed to Vercel live domain (https://smart-card-inky.vercel.app). All QR codes and scanner links now generate production URLs.

04

Admin Auth Hardening & SHA-256 Encryption

ةئبعتلا ،ةعيرسلا طبض ةملك لرملا ةيضارتفلاا admin1234 ،ريفشتا SHA-256 لفك

Removed plain-text password helpers and quick-fill buttons from the UI. Configured default password to "admin1234", client-side SHA-256 hashing, and in-dashboard password updates.

05

Admin Login Footer Label: Safe & Protected

ليدعتص نليبختلا يف ةشاش ليجست لوخدلا ىلا ةنما" "ةيمحم"

Updated the footer badge in AdminLoginView.tsx strictly to "b&Edf) d†EbÖEd¦)" with golden lock icon, matching exact user specification.

06

Comprehensive PDF Reports Generation & Direct Downloads

ديلوتلافلام PDF ةلماك قيثوتلا ةصنملا لوكا لرشملا يجمربلا لماشلا

Built automated PDF export pipelines generating high-resolution downloadable documentation and complete codebase archives accessible directly.

07

Security Hardening & High-Contrast Card Search

معالجة الثغرات الخمس بالكامل وتحسين تباين خانة بحث الكروت

Implemented server-side requireAdminAuth middleware, express-rate-limit, old password verification, strict URL scheme validation, and redesigned manual card ID search with high-contrast amber styling.

08

Universal Database Password Sync & Complete Credentials Superseding

تحديث ومزامنة كلمة مرور من الأدمن عبر قاعدة البيانات السحابية بالكامل

Configured seamless real-time password updates from the admin dashboard directly into Cloud Firestore (settings/auth and platform_settings/auth) and server filesystem (data/auth.json). Once changed, the new password immediately supersedes all previous credentials across all devices and sessions.

09

Admin Platform Switcher Auto-Clear & Instant Input Focus

تفريغ تلقائي وفوري للبيانات القديمة عند تغيير المنصة في لوحة الأدمن

Implemented handleSelectPlatform in EditQrModal to automatically purge and clear old URLs, phone numbers, and bank details when switching target platforms, dynamically updating labels and placeholders with direct clear shortcuts.

2. TECHNICAL ARCHITECTURE & INFRASTRUCTURE

البنية التقنية والتكنولوجية للمنصة

Frontend Core	React 19 (Hooks, Functional Components, Strict Mode), TypeScript 7
Styling & UI	Tailwind CSS 4 (@tailwindcss/vite), Lucide React Icons, 3D CSS transforms
Build System	Vite 8 SPA bundler with zero-latency HMR & production tree-shaking
Production Hosting	Vercel (https://smart-card-inky.vercel.app) with automatic Git deployments
Backend & API	Express.js dev proxy + Vercel serverless functions (/api/redirect.ts)
Security Standard	Client-side SHA-256 Web Crypto hashing, sanitized nanoid keys, CORS protection
Deep Linking	Auto-routing engine for WhatsApp (wa.me), InstaPay (ipn.eg), Phone, Bank cards

3. OPERATIONAL GUIDE

دليل التشغيل والاستخدام لمدير الأعمال

- Adding New Cards: Generate single or bulk QR cards (nanoid identifiers) with custom subscription durations.
- Customer Activation: Customers scanning an unconfigured card arrive directly at the branded activation screen.
- Instant Redirection: Configured active cards redirect with HTTP 302 directly to WhatsApp, InstaPay, or Web.
- Payment Copy Screen: Egyptian wallet numbers (010, 011, 012, 015) and Bank accounts render a luxury copy UI.
- Admin Security: Password updates are hashed via SHA-256 and persisted in local and cloud state instantly.
